SUMMARY

Video and data annotation specialist with over seven years of experience labeling and rating AI training data against detailed guidelines. Has completed video annotation work on Handshake AI for over three years, including identifying objects, actions, and events and rating clarity and quality. Known for consistent accuracy (99.4% QA rating), 800+ written evaluations, and clear, structured feedback. Native English speaker with a background in geomatics, where precise data handling was central.

SKILLS

- Video annotation: object, action, and event labeling; clip quality and clarity rating
- Data labeling and rubric-based rating on multi-point scales
- Quality assurance and consistency checking against guidelines
- Attention to detail, analytical thinking, independent work to detailed instructions
- Audio and speech annotation (ASR/TTS), error categorization
- Written English (native)
- Tools: Labelbox, Scale Studio, Anthropic Workbench, Audacity, Python, Jupyter, Git

EXPERIENCE

Video Annotation Specialist (Freelance), Handshake AI (Remote), 2023 – Present

- Annotate short video clips by identifying objects, actions, and events according to project guidelines.
- Evaluate video quality, relevance, and accuracy, and rate clarity and camera angles on a 1 to 10 scale.
- Assess the clarity and plausibility of movements and flag quality issues for review.

Senior AI Voice and Conversational Specialist, Scale AI (Remote), January 2023 – Present

- Rate and compare outputs from AI models and voice agents side by side, documenting the reasons for each rating.
- Wrote over 800 written rationales citing specific timestamps, audio disfluencies, and deviations from instructions.
- Categorize recurring audio and language error types (such as pronunciation distortion, unnatural pauses, and tone errors) and report them to the research team.
- Design standardized templates so that annotators can apply the same criteria consistently.

Conversational AI and Audio Annotator, Appen (Remote), August 2021 – December 2022

- Evaluated voice assistants against quality rubrics covering pronunciation, prosody, acoustic artifacts, and dialogue coherence.
- Recorded and annotated scenario-based vocal interactions to build labeled datasets for speech recognition and speech synthesis.
- Audited English transcriptions and text-to-speech alignment, maintaining a 99.4% quality assurance rating.

Data and Search Relevancy Specialist, Telus International (Remote), July 2019 – July 2021

- Transcribed, annotated, and rated audio query responses on multi-point qualitative and quantitative scales.
- Assessed intent resolution and task completion for smart assistant pipelines.

Independent Business Owner and Contractor, Self-Employed, 2019 – Present

- Manage independent projects end to end, from client requirements through delivery, with a focus on self-directed work and clear communication.

EDUCATION

- M.Eng. in Geomatics, Hochschule Neubrandenburg University of Applied Sciences, Germany (in progress)
- B.Tech. in Surveying and Geoinformatics, Federal University of Technology, Owerri, Nigeria

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty (2024)
- Generative AI and Conversational Voice Systems, DeepLearning.AI (2023)
- Advanced Prompt Engineering and Dialogue Systems, Coursera / Vanderbilt University (2022)

LANGUAGES

English (native)
